Welcome to Darcel

Over the years the Darcel team has designed, created and supplied some of the most elegant and modern door furniture in the world.

Darcel is recognised as one of the UKs most trusted suppliers within the industry, whilst always maintaining the very highest quality standards and finishes.

All our handles are made from the very highest grade solid cast zinc and come with a 15 year guarantee on all mechanical parts and also a 3 year guarantee on our specially designed protective resin coating.

We have worked closely alongside our manufacturing partners to create **Titan Evo Protective Coating**.

The revolutionary new coating provides far superior resistance to scratches and chemical breakdown on all our handles. We chose to invest heavily in this technology so our customers can keep the finish they expect for many years.

We offer a large range of architectural ironmongery which was all borne from our Italian design partners in Messina, Italy.

Our designs were all created with a true passion to offer our customers the most modern, stylish handles to complement their vision for a high-end finish to their doors.

We have always been strong believers in reducing how our business impacts the world. We recently decided to lead the way in the industry by only working with manufacturing partners which have the same ethos as us and ensuring our world stays green for generations to come.

Darcel Point of Sale Stand

Our Journey

Over the years we have grown to become a leader within our industry. Although we still maintain our family ethos and believe that much of our success has been achieved through our excellent partner service and attention to detail.

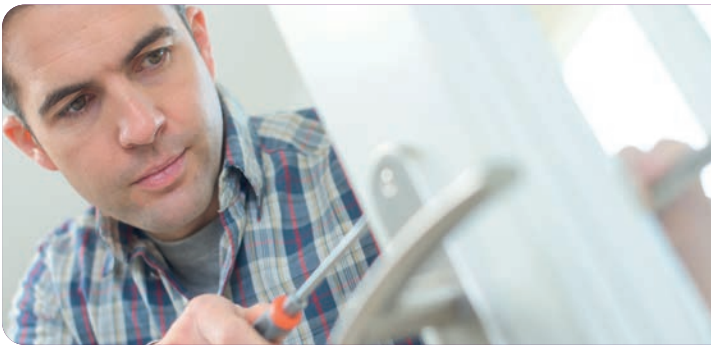

Visit: www.darcelhandles.co.uk

Darcel
THE ART OF STYLE

We have worked closely alongside our manufacturing partners to create Titan Evo Protective Coating. The revolutionary new coating provides far superior resistance to scratches and chemical breakdown on all our handles. We chose to invest heavily in this technology so our customers can keep the finish they expect for many years. The technology has been transferred under licence by our manufacturing partners and applied to all our new handles from 2018.

We wanted the Darcel range to benefit in the superior hard wearing qualities which Titan Evo offers and give our handles the durability and scratch resistance which the market demands.

Fitting Instructions

PLATE HANDLE FITTING INSTRUCTIONS

- Mark out the centre hole for your spindle to sit through. Drill through door with a 20mm drill bit.
- Place spindle through hole in door and place back plates square and evenly either side of door.
- Mark all screw holes with a bradawl.
- Remove backplates and spindle bar.
- Drill pilot holes for the wood screws to be inserted on all bradawl marks using 2mm drill bit.
- Re-attach the spindle through door lock/latch and attach backplates to door using screws supplied.
- Tighten all grub screws to secure the spindle to door using allen key provided.

ROSE HANDLE FITTING INSTRUCTIONS

- Mark out the centre hole for your spindle to sit through. Mark out 19mm to the left and 19mm to right of your centre hole.
- Drill centre hole with 20mm bit and two other holes with 5mm bit all the way through the door.
- Remove outer rose cover and gently slide off to reveal fixing holes. Take care not to damage the handle when removing the rose cover.
- Locate spindle into one lever ensuring that the spindle groove is aligned with the grub screw hole in the lever shank. Once lever is suitably aligned secure it in place with the grub screw provided.
- Insert the spindle through the lock/latch ensuring that both handles face correct way up on both sides of door and spring action works in the correct way.
- Insert both bolts through inner rose and tighten bolts. Then using screws supplied secure all screws in place.
- Finally screw the rose cover back on to handles to conceal all bolt/screw holes.
